

Creak Freak

Description

Creak Freak is an assembly grease used for persistent squeaks and prevents lubricated parts from sticking. The grease is resistant to extremely high temperatures and is perfect for aluminum, titanium and carbon parts. The assembly grease is particularly suitable for assemblies in pressure systems, e.g. sheathing, steering tubes.

Creak Freak is resistant to acids, caustic components, salt water and fresh water.

Features:

- Huge temperature range
- Paint compatible
- Good protection against corrosion
- Good water resistance

Application:

ND Tuned Creak Freak is used for persistent squeaks and prevents lubricated parts from sticking.
